## REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance: the prior art of record fails to anticipate or make obvious the structure of a saw with a detection system and a replaceable brake cartridge. The detection system for detecting contact between a person and the blade while the blade is moving and to distinguish that contact from contact between green wood and the blade by imparting a signal to the blade and monitoring that signal for a predetermined rate of change indicative of contact with a person. The replaceable brake cartridge for stopping the blade when the detection system detects contact between a person and the blade, wherein the cartridge includes a housing, brake pawl, biasing mechanism, and a release mechanism all of which are at least partially enclosed by the housing.

It should be noted that for the purpose of interpretation of the claim language the phrase "adapted to" has been interpreted as "for". Although, one may argue that, e.g., most controls, detection systems, and brake cartridges are capable of being adaptable for numerous functions, the instant claims require that the detection and brake cartridge perform specific functions not found in the prior art nor are any of the prior art references of record capable of said functions.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
